

# 10 Recalled Products

## To Be Aware Of in August 2018

### 1 BMC Bicycles

These bikes may have varying tire dimensions, ride load, tire pressure and head set. All of these things can cause an insufficient amount of space between the downtube and front wheel. If you have one of these bikes, email [timemachine01\\_us@bmc-switzerland.com](mailto:timemachine01_us@bmc-switzerland.com) for information about an inspection and replacement parts if needed.

### 2 Miller Fireworks

The fireworks may be overloaded with pyrotechnics that result in an audible effect. This overloading violates federal safety standards. Because they are overloaded, they may cause a larger explosion than the consumer expects, putting themselves and others at risk. Email [sales@millerfireworks.com](mailto:sales@millerfireworks.com) to see if your fireworks are part of the recall.

### 3 Thermal Printer Power Supply Units

These thermal printer power supply units manufactured by Zebra Technologies are being recalled due to degradation and corrosion. There were more than a million units sold across the country. Zebra is offering a free replacement for consumers. You can email [PSUrecall@zebra.com](mailto:PSUrecall@zebra.com) or call (800) 658-3785 for more information.

### 4 Salmonella in Food

Salmonella has been reported in a wide variety of foods in the past couple of months, from snack cakes to raw meat. Whatever food you believe you got sick from, you'll need to contact that manufacturer to learn about refunds and other compensation. Your best bet is to keep up to date on all outbreaks and get more information on individual foods on the CDC's website.

### 5 Nutrex Pressure Cookers

Nutrex stovetop pressure cookers may discharge steams at pressures that are too low. About 700 of these cookers were sold in the United States. The consumer may not be expecting this and could suffer burns as a result. Contact [CustomerService@RenaWare.com](mailto:CustomerService@RenaWare.com) for more information on obtaining a repair for your unit.

### 6 Hill Topper Electric Bike Motor

If you have a Hill Topper Electric Bike Motor manufactured by Clean Republic, you need to stop using it. The motor controller can let water in which may cause the motor to accelerate by itself. This poses the risk of crash and injury. Email [support@ukko.io](mailto:support@ukko.io) for more information about the recall and obtaining a replacement.

### 7 NEMO Stargaze Recliner Chair

If you have one of the 23,000 chairs made by NEMO Equipment, you could be part of this recall. The Stargaze Recliner Chair has plastic joint supports that may break and cause the legs to fail. Email [journey@nemoequipment.com](mailto:journey@nemoequipment.com) for more information on obtaining a replacement chair.

### 8 Polaris Gravely Utility Vehicles

Polaris has issued a recall of its Gravely Utility Vehicles, and is advising buyers stop using it immediately. The exhaust's header pipe can crack, which poses a burn hazard to the operator and others. Your Gravely dealer will repair your vehicle for free. Call (877) 740-7060 to find out if your vehicle is part of the recall.

### 9 Vitamix Blending Containers

Ascent and Ventura Series of Vitamix blending containers may pose a laceration hazard. About 105,000 units were sold and are being recalled. The containers may separate from their base, exposing the blades. Call (888) 847-8842 for a free repair kit if you own one of these models.

### 10 Harbor Freight Handgun Safes

About 25,000 of these safes were sold across the country and may open upon impact. This will allow anyone to access the contents of the safe. If you have a handgun safe sold by Harbor Freight Tools, email [recall@harborfreight.com](mailto:recall@harborfreight.com) for more information about obtaining a full refund.
